KNXs Universal actuator

The new KNX universal actuator combines versatile functions in an extremely compact housing: as a universal dimming and valve actuator and as a switching actuator with semiconductor output, it is perfect for a wide range of applications. Silent operation makes it the ideal solution for use in sensitive areas such as hotels, offices or quiet areas. Thanks to KNX Secure, it also offers maximum security against unauthorised access.

Multifunctional use:

- Universal dimming actuator (phase cut)
- Valve actuator with PWM (pulse width modulation)
- Switch actuator with semiconductor
- 2 binary inputs
- Integrated convenience and logic functions

NEW:

- KNX Secure
- 1-channel
- Extremely compact: only 1 TE
> plenty of space in the distribution box
- Silent, therefore suitable for use
in quiet areas, hotels, offices...

Technical data:

Tension:	via KNX-BUS
Dimensions:	55 x 18 x 90 mm (1 TE)
Power consumption:	3 mA
Typical power consumption:	0.2 W
Protection type/class:	IP20 / Class II
Ambient temperature:	-5°C to +45°C
Connections and cables:	1 x KNX bus terminal black/red 6 x screw terminals 0.34 ... 2.5 mm ² rigid 0.34 ... 2.5 mm ² finely stranded
Switching capacity:	0 - 200 W Ohmic load 0 - 24 W / 4 LED (Phase control) 0 - 100 W / 10 LED (Phase control)
Outputs:	1 x semiconductor output
